

The Leader in Internet Safety Education

# i-SAFE creates i-LEARN Online to build a responsible and safe cyber world

## The Revolution Starts Now

The i-SAFE i-LEARN Online program is a revolutionary concept that will change the way you learn. We know you are busy and need a system of learning where you can stop, pause, and rewind at your convenience. We know you will want to focus on certain subjects first, and others later. That is why we have created an “on demand” system for Internet safety education. i-LEARN Online has the lessons you want, when you want them, all with the click of a mouse.

## What is i-LEARN Online?

It is what it says it is—online learning. i-LEARN Online is for you if you do not have time to attend our day-long Premiere Professional Development Program (PDP) in person. i-LEARN Online is for you if there is no face-to-face training in your area. The i-LEARN Online program brings the education to you. These sets of online videos on Internet safety cover the six subjects everyone needs to know in order to teach safe and responsible use of the Internet. Once you view these videos you are trained to educate others on those subjects you have viewed. After you are trained, just fill out the implementation plan and you will receive all the materials you need free of charge.

## Train-the-Trainer

Those who finish viewing all the modules join an elite group within i-SAFE America. We call these members i-SAFE Certified Train-the-Trainers. A Certified Train-the-Trainer has the added ability to teach others how to teach the i-SAFE curriculum. This is key to heighten the awareness of Internet safety issues in a community. This is the ultimate goal of the i-LEARN Online program.

## Education Makes a Difference

- **84% of students say they will be more careful about where they go and what they do on the Internet**
- **89% indicate they will be more careful about the email attachments they open**
- **88% will be more careful about sharing personal information with those they meet in chat rooms and other places on the Internet**
- **73% believe there is a need for Internet safety education**

## i-Mentor Training Network

We all know that truly safe and responsible use of the Internet cannot and will not occur without peer-to-peer mentoring. That is where the i-Mentor Training Network takes over. This portion of the i-LEARN Online program is specifically designed to enable students to spread the message to their friends, their parents, their community, and beyond.

# The Leader in Internet Safety Education Drives the Future of Online Learning

## Internet Issues

A recent i-SAFE survey reveals 53 percent of students prefer to be alone online, 31 percent admit to chatting with people they have never met in person, and 12 percent say they have met face-to-face someone they previously met online. There are cyber predators out there that are looking to take advantage of these numbers. There are rules of the road for everyone on the information super-highway. The i-LEARN Online program will teach you about the detours and roadblocks found online.

## Community Outreach is a Must

i-SAFE is the only Internet safety education program that combines curriculum with activities for community outreach and youth empowerment. The i-LEARN Online program and the i-Mentor Training Network will teach you how to work with i-SAFE and make a difference in the world. Step-by-step you will find the best method of empowering your neighbors and peers through the i-Mentor program, i-Adopt-a-School program, i-Parent program, Community Action Teams and/or Town Hall Meetings.

### i-Mentor Training Network

- **Assembly Experience**—*Dynamic multi-media safety presentation*
- **Community Leaders**—*How to work with area leaders*
- **Intern Program**—*Real world experience with learning credit*
- **Certified Mentor**—*Learn cyber safety and protect others*
- **i-Parent Program**—*How to reach out and train parent groups*
- **i-Adopt-a-School**—*Educate others with the i-SAFE curriculum*

### i-LEARN Online

- **Personal Safety**—*Introduction to Internet safety*
- **Cyber Community Issues**—*Detours and roadblocks found online*
- **Cyber Predator Identification**—*How to recognize and avoid*
- **Cyber Security**—*Viruses, worms, Trojan horses, and worse*
- **Intellectual Property**—*Proper usage online*
- **Effective Outreach**—*Community activities to spread the message*

## Get Involved:

- **Log on to [ilearn.isafe.org](http://ilearn.isafe.org)**
- **Log in with your i-SAFE username and password, or click on "create an account"**
- **Watch the "Personal Safety" video in its entirety**
- **Submit an implementation plan to teach the "Personal Safety" lessons**
- **View the other videos in their entirety**
- **Submit an implementation plan as an i-SAFE Certified Train-the-Trainer**
